Company Profile

Aerotel Medical Systems is a world leader in cost-effective, high quality, user-friendly systems for the home care, e-Health and Telemedicine markets.

Aerotel's World of Telemedicine and Telecare

Every day around the world, Aerotel is helping clients generate new revenue opportunities, save costs and enhance their healthcare or personal safety services.

A leading global manufacturer of modular, mobile and home based telemedicine and telecare solutions, Aerotel's easy-to use, state-of-the-art systems are designed to transfer essential medical, environmental and location-based data over the telephone, mobile phone, wireless devices, the Internet and other electronic media.

A History of Success

Aerotel Medical Systems was established in 1998, when its founders identified the need to ease the burden of the rising costs and diminishing efficiency of primary health care services. Aerotel soon became an important player in the field of remote medical monitoring, focusing on the development of advanced telemedicine and telecare solutions.

In January 2007, Aerotel acquired Tadiran LifeCare, a division of Tadiran Spectralink Ltd. With this acquisition, Aerotel expanded its product offering and enhanced its position as a leading provider of innovative remote monitoring solutions for improving people's health, safety and quality of life.

World Leader in Cost-Effective Telehealth Systems

Today, Aerotel Medical Systems is considered a world leader in cost-effective, high quality, user-friendly, medical diagnostic systems and devices for the home care, eHealth and telemedicine markets. The company's end-to-end hardware and software platforms, including phone, cellular and web-based software solutions, guarantee streamlined disease management, with a wide range of solutions designed for a variety of remote diagnostic, emergency services, rehabilitation and monitoring applications.

At the Cutting-Edge, Yet Easy-to-Use

All of Aerotel Medical Systems' solutions ensure optimal performance and maximum reliability. The company takes great pride in its ability to assist physicians in making an accurate diagnosis, despite the physical distance between them and their patients. It is equally proud of the fact that its systems help patients lead normal, mobile lives by eliminating the psychological stress resulting from daily monitoring in a health clinic.

A Global Presence

With a client base in over 45 countries around the globe. Aerotel is the proud recipient of Frost & Sullivan's "Patient Monitoring Company of the Year Award 2006" and the "Innovation and Growth Strategy Leadership of the Year Award 2007".
