

Aerotel's Wireless Data Hub Receives FCC Certification

Connect-Cell™, which collects data for remote monitoring applications, is already being deployed in the USA and will be presented at Medica 2010 trade fair.

Dusseldorf, Germany, November 2, 2010 -- [Aerotel Medical Systems](#), a leading global supplier of advanced remote monitoring solutions for personal telehealth and telecare, has received the U.S. Federal Communications Commission (FCC) Certification for its new data hub, [Connect-Cell™](#).

Connect-Cell™ can collect various environmental, industrial or personal data for remote monitoring applications. One of its most advanced applications of this innovative device is as a homecare data hub that enables users to easily transmit vital signs data via the cellular network to a central monitoring center. This solution is already deployed in the USA by AMC Health (New York), a leading homecare monitoring company that provides remote monitoring services for chronically ill patients belonging to more than 65 diverse health care organizations.

Aerotel will present the Connect-Cell™ and other remote monitoring and homecare solutions at Medica 2010, the leading international trade fair for the medical industry, which will take place in Dusseldorf, Germany on November 17-20, 2009 (Hall 9/C01).

"The ageing population worldwide, along with rise in chronic diseases, creates an acute need to reduce health spending and improve medical services by using new innovative technology products," said David Rubin, Aerotel Medical Systems President & CEO. "Aerotel homecare and personal health solutions addresses these needs by utilizing existing communications networks for the benefit of both patients and healthcare providers."

Other Aerotel solutions that will be presented by Aerotel at Medica 2010 trade fair include:

- **e-CliniQ™** - A complete home monitoring solution for patients with chronic conditions, such as CHF, COPD and diabetes.
- **Heartline™** - A versatile monitoring solution for cardiac patients, including a variety of 1 to 12-lead electrocardiogram (ECG) system and receiving software and patient database management.
- **LifeCare™** - a personal communicator with distress alarm and GPS location, which offers a new level of personal safety and peace of mind.
