

Aerotel to Present new Mobile-Health Solutions at Mobile World Congress 2013

New Android®-based app will enable healthcare providers to reduce costs and personalize care using remote wireless patient monitoring

Barcelona, Spain, February 20, 2013 – [Aerotel Medical Systems](#), a leading global supplier of advanced remote monitoring solutions for telehealth and telecare, will present new mobile health (mHealth) applications and other eHealth and telehealth solutions at the [Mobile World Congress \(MWC\) 2013](#) in Barcelona, Spain, from February 25–28, at Hall 5, Stand **5H70** (Israeli National Pavilion).

The newest addition to Aerotel’s growing mHealth portfolio is a new release of **Mobile-CliniQ™** – an Android®-based mobile health monitoring application that allows the monitoring of various parameters and communicates with vital sign monitoring devices via a Bluetooth® interface. Data is automatically transmitted via the cellular or Wi-Fi network to a medical monitoring center.

This smartphone application enables remote monitoring of various health parameters such as electrocardiogram (ECG), blood pressure, blood glucose level, weight, spirometry values and more. An easy-to-use and flexible solution, the new **Mobile-CliniQ™** enables healthcare providers around the world to deliver enhanced mobile health services, save critical time, and provide a more personalized service. Mobile-CliniQ comes in two flavors - for individual users and for medical professionals.

“The mobile health market offers significant growth opportunities and is appealing to both healthcare service providers and mobile carriers,” said David Rubin, Aerotel Medical Systems president and CEO. “Aerotel strives to be a leader in this area and will continue to innovate and introducing new solutions. With Mobile-CliniQ, personal health services become a reality for today's mobile lifestyle.”

Additional innovations to be presented by Aerotel in Hall 5, Stand **5H70**, (Israel National Pavilion), include:

[Wireless homecare hub](#) – **Connect-Cell™** is a highly flexible wireless homecare hub for chronic patient monitoring and disease management, enabling users to easily transmit vital signs data via the cellular network (GPRS) to a central monitoring center.

[Wireless ECG](#) – Aerotel’s **HeartView™** Personal hand-held 12-lead ECG monitor with Bluetooth® connectivity. The solution enables easy and effective transmission of clinical information to a remote monitoring center for interpretation and immediate care.

[GeoSkeeper™](#) – a personal GPS location and tracking system which offers a new level of safety beyond existing PERS (Personal Emergency Response System) and traditional social alarm systems.

About Aerotel Medical Systems

Aerotel Medical Systems is a world-leading provider of cost-effective, high-quality and user-friendly medical diagnostic systems and devices for home care, eHealth and telemedicine, as well as telecare and personal safety.
