Medi-CliniQ™

Public Multi-Parameter Medical Acquisition Center

Medical Parameters Transmission from Points of Care

Medi-CliniQ is a public system designed to supply primary health care services where medical staff is scarce. Capable of connecting different medical devices with digital output, it can accommodate an unlimited amount of users. Medi-CliniQ can be installed as a stand-alone unit or in modules, according to client specifications. On-screen, user-friendly guidelines direct patients on how to perform necessary tests. Once Medi-CliniQ acquires data, it automatically transmits it to the MPM Receiving Center via the Internet.

Spirometer

Pulse Oximeter

Applications

- Public-care data acquisition station

Features

- Easy device set-up
- Smart card reader (optional)
- User-friendly, on-screen guidelines
- Option: Add-on video-conferencing unit

Benefits

- Unlimited number of users from same location
- Provides fast and easy access to primary health care
- Cost effective
- Reduces healthcare delivery costs

Users

- Pharmacies
- Third age nursing homes
- National health centers
- Remote locations
- Private clinics
- Gyms

Compatibility - Medi-CliniQ™ is compatible with various digital medical devices. For updated information please contact us.
